

Porsche DMS Web Inventory

Screenshots

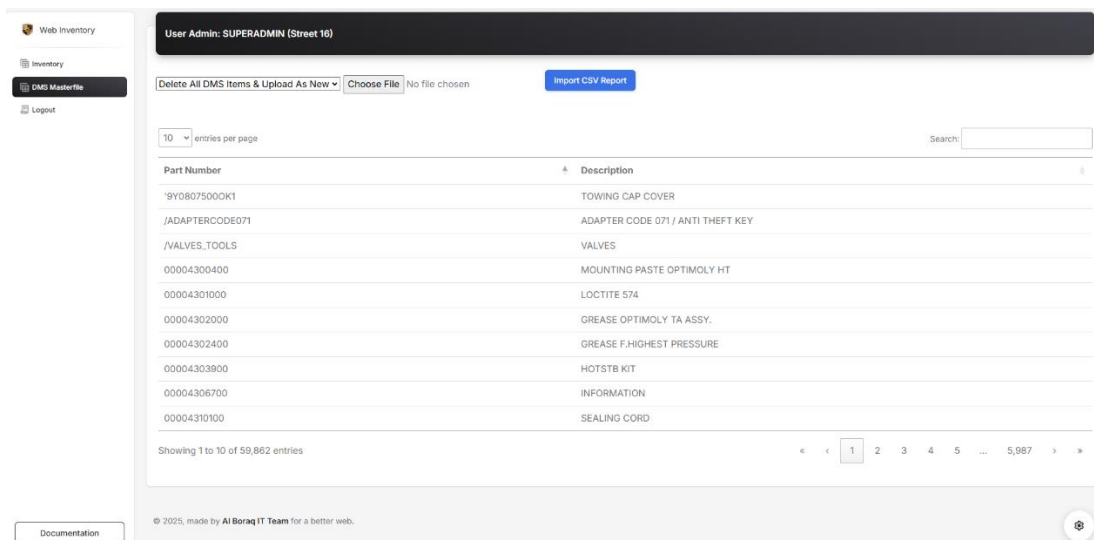

Login:

-User login is connected to the DMS user accounts.

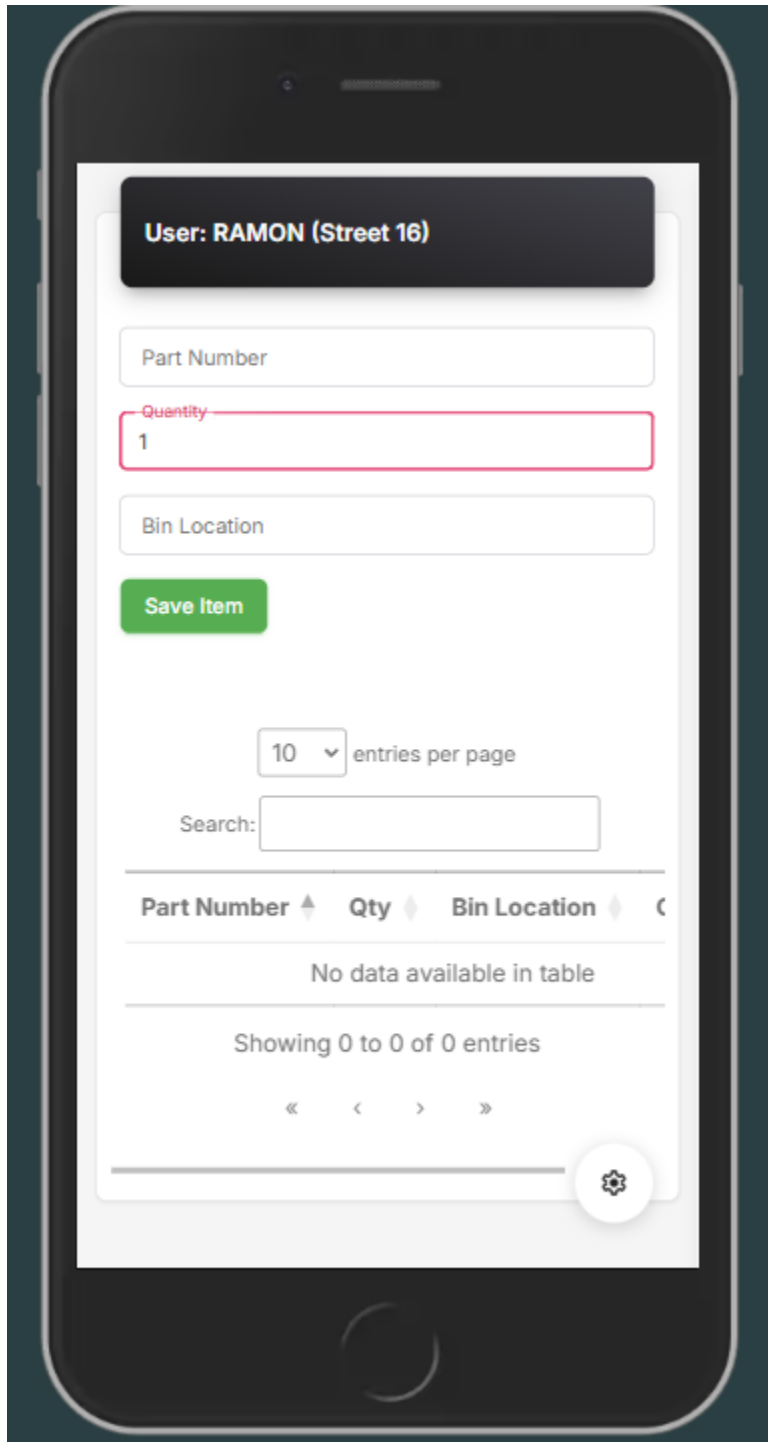

DMS Materlist:

- The admin can update the masterlist by uploading a CSV template. Each upload will overwrite and refresh the masterlist with the new data.

Inventory Count:

- The inventory clerk can perform the inventory using the company mobile device, either by scanning with a USB barcode scanner or manually entering data for the actual count.

The image shows a mobile application interface for inventory management. At the top, a dark header bar displays the user's name: "User: RAMON (Street 16)". Below this, there are three input fields: "Part Number", "Quantity", and "Bin Location". The "Quantity" field is currently set to "1" and is highlighted with a red border. A green "Save Item" button is positioned below the input fields. Further down, there is a dropdown menu showing "10" with a downward arrow, followed by the text "entries per page". Below this is a search bar with the label "Search:". At the bottom, there is a table header with columns: "Part Number", "Qty", "Bin Location", and a partial column "C". Below the header, the text "No data available in table" is displayed. At the very bottom, it says "Showing 0 to 0 of 0 entries" and includes navigation arrows: "«", "<", ">", and "»". A gear icon for settings is located in the bottom right corner of the app interface.

User: RAMON (Street 16)

Part Number

Quantity
1

Bin Location

Save Item

10 entries per page

Search:

Part Number	Qty	Bin Location	C
No data available in table			

Showing 0 to 0 of 0 entries
